- 09.15 Procedures for two-year old children

## 09 Childcare practice policy

Alongside associated procedures in 09.1-09.15 Childcare practice, this policy was adopted by Fairview Under Fives Group on 1<sup>st</sup> November 2021.

### Aim

Children are safe, happy, and eager to participate and to learn.

### Objectives

- Babies and young children need to form a secure attachment to their key person when they join the setting to feel safe, happy and eager to participate and learn. It is their *entitlement* to be settled comfortably into a new environment.
- The needs of part-time children are considered.
- There is a procedure for when children do not settle and for prolonged absences.
- Introductions and induction of the parent is carried out before children start.
- *Prime times* of the day make the very best of routine opportunities to promote ‘tuning-in’ to the child emotionally and create opportunities for learning. We actively promote British values, inclusion, equality of opportunity and the valuing of diversity.
- We operate a positive behaviour management approach. Behaviour management procedures cover how staff should respond to all aspects of behaviour, including children who exhibit challenging behaviour towards other children. These procedures build on the Early Years Alliance’s approach to learning based on three key statements.
  1. Learning is a lifelong process, which enables children and adults to contribute to and shape their world.
  2. We want the curriculum we provide to help children to learn to:
    - be confident and independent
    - be aware of and responsive to their feelings
    - make caring and thoughtful relationships with other people
    - become increasingly excited by, interested in, and knowledgeable and questioning about the world around them.
  3. We provide a wide range of interesting child-chosen and adult-initiated activities which:
    - give children opportunities to use all their senses
    - help children of different ages and stages to play together
    - help children be the directors of their own learning

- help children develop an inquiring and questioning attitude to the world around them

### **Older Children (2-5 years)**

- To feel securely settled and ready to learn, children from two to five years need to form attachments with adults who care for them, primarily to a key person, but with other adults and children too. In this way children feel part of a community of learners; they can contribute to that community and receive from it. The three-stage model is applicable, but with some differences in the procedures for children moving up into the next group and for older children.

### **Waiting list and admissions**

Our provision is accessible to children and families from all sections of the local and wider community. We aim to ensure that all sections of the community receive accessible information and that our admissions procedures are fair, clear, and open to all parents who apply for places. The availability of a place at the setting considers staff/child ratios, the age of the child and registration requirements.

- We endeavour to operate in an inclusive manner which enables all children and families to access our services.
- We also have regard for the needs of parents who are:
  - looking to take up work, remain in work or extend their hours of work
  - looking to commence training or education
- We work in partnership with the local authority and other agencies to ensure that our provision is accessible to all sections of the community.
- Services are widely advertised and information is accessible to all sections of the community.
- Where the number of children wanting places exceeds the number of places available a waiting list is operated using clear criteria for allocation of places as detailed in section 09.1 Waiting list and admissions procedure.

### **Funded places – free entitlement**

All 3- and 4-year-olds in England are entitled to 15 hours free childcare each week for 38 weeks of the year. Some eligible 2 year olds are also entitled. Funded places are offered in accordance with national and local codes of practice and adherence to the relevant Provider Agreement/Contract with the local authority.

## **Legal References**

Special Educational Needs and Disability Code of Practice (DfE and DHSC 2014)

Equality Act 2010

Childcare Act 2006

## 09 Childcare practice procedures

### 09.1 Waiting list and admissions

We aim to ensure that all sections of the community receive accessible information, and that our admissions procedures are fair, clear and open to all parents who apply for a place.

- The setting is widely advertised in places accessible to all sections of the community.
- Information about the setting is accessible, using plain English, in written and spoken form and, where appropriate, provided in different community languages and in other formats on request.
- Children with disabilities are supported to take full part in all activities within the setting and the setting makes reasonable adjustments to ensure that this will be the case from the time the child is placed on the waiting list.
- The waiting list is arranged in birth order and in addition may take into account the following:
  - the age of the child with priority being given to children eligible for the free entitlement
  - length of time on the waiting list
  - the vicinity of the home to the setting
  - siblings already attending the setting
  - the capacity of the setting to meet the individual needs of the child
- Funded places are offered in accordance with the Early Years Entitlements: Operational Guidance for local authorities and providers (DfE 2018) and any local conditions in place at the time,
- Where it is financially viable to do so, a place is kept vacant for an emergency admission.
- The setting and its practices are welcoming and make it clear that fathers, mothers, other relations and carers and childminders are all welcome.
- The setting and its practices operate in a way that encourages positive regard for and understanding of difference and ability, whether gender, family structure, class, background, religion, ethnicity or competence in spoken English.
- The needs and individual circumstances of children joining the setting are monitored on 09.1c Childcare registration form, to ensure that no accidental or unintentional discrimination is taking place and that reasonable adjustments are made as required.

- Section 05 Equality procedures is shared and widely promoted to all.
- Places are provided in accordance with 09.1d Childcare terms and conditions issued to every parent when the child takes up their place. Failure to comply may result in the provision of a place being withdrawn.

### **Admissions**

- Once a childcare place has been offered the relevant paperwork is completed by the office manager before the child starts and filed on the child's personal file. Forms completed include:
  - 07.1a Privacy notice - explains what personal data we collect, why we collect it, how we use it, the control parent/carers have over their personal data and the procedures we have in place to protect it.
  - 09.1d Childcare terms and conditions - govern the basis by which we provide childcare.
    - 09.1c Childcare registration form - contains personal information about the child and family that must be completed in full prior to the child commencing.

### **Children with SEND**

- The manager must seek to determine an accurate assessment of a child's needs at registration. If the child's needs cannot be met from within the setting's core budget, then an application for SEN inclusion funding must be made immediately.
- Children with identified SEND must be offered a place when one becomes available as with any other child. However, the start date for children with more complex SEND will be determined by the preparations made to ensure the child's safety, well-being and accessibility in the setting. If a child's needs determine that adjustments need to be made, the manager must outline a realistic timeframe for completion, detailing the nature of adjustments e.g. risk assessment, staff training, health care plan and all other adjustments required. The child's safety at all times is paramount.
- At the time of registration, the manager must check to see if a child's family is in receipt of Disability Living Allowance, if so, the manager must ask for evidence to enable them to claim the Disability Access Fund directly from the local authority. If the family is eligible but not in receipt of the allowance, the setting manager will support the family in their application. More information can be found at [www.gov.uk/disability-living-allowance-children/how-to-claim](http://www.gov.uk/disability-living-allowance-children/how-to-claim).
- Preparation for admitting a child with SEND must be made in a reasonable amount of time and any delay in the child starting is scrutinised by the setting manager to avoid discrimination and negative impact on the child and family. During a preparation period the family and relevant agencies and the local authority must be regularly updated on the

progress of the preparations.

### **Safeguarding/child protection**

If information is provided by the parents that a child who is starting at the setting is currently, or has had involvement with social care, the designated person will contact the agency to seek further clarification.

Parents are advised on how to access the setting's policies and procedures.

### **Further guidance**

Early Years Entitlements: Operational guidance for local authorities and providers (DfE 2018)

## 09 Childcare practice procedures

### 09.2 Absence

We take steps to ensure that children are kept safe, that their wellbeing is promoted, and they do not miss out on their entitlements and opportunities. At the very least, good attendance promotes good outcomes for children. In a small minority of cases, good attendance may also lead to early identification of more serious concerns for a child or family.

There are several reasons why a child may be absent from a setting. In most cases it is reasonable to expect that parents/carers alert the setting as soon as possible, or in the case of appointments and holidays give adequate notice. Parents are advised that they should contact the setting within one hour of the time the child would have been expected to advise of their absence. Designated persons must also adhere to Local Safeguarding Partners (LSP) requirements, procedures and contact protocols for children who are absent or missing from childcare.

- If a child who normally attends fails to arrive and no contact has been received from their parents, the designated person, takes immediate action to contact them to seek an explanation for the absence and be assured that the child is safe and well.
- Attempts to contact the child's parents or other named carers continue throughout the day on the first day of absence.
- If no contact is made with the parents and there is no means to verify the reason for the child's absence i.e. through a named contact on the child's registration form, this is recorded as an unexplained absence on the child's personal file and is followed up by the manager each day until contact is made.
- If contact has not been made within three working days, children's services will be contacted for advice about making a referral. Other relevant services maybe contacted as per LSP procedures.
- All absences are recorded on the child's personal file with the reason given for the absence, the expected duration and any follow up action taken or required with timescales.
- Absence records are retained for at least three years, or until the next Ofsted inspection following a cohort of children moving on to school.

If at any time further information comes to light that gives cause for concern, procedure 06.1 Responding to safeguarding or child protection concerns is immediately followed.

## **Safeguarding vulnerable children**

- The designated person or key person attempts to contact the parents to establish why the child is absent. If contact is made and a valid reason given, the information is recorded in the child's file.
- Any relevant professionals involved with the child are informed, e.g. social worker/family support worker.
- If contact is made and the designated person is concerned that the child is at risk, the relevant professionals are contacted immediately. The events, conversation and follow-up actions are recorded. If contact cannot be made, the designated person contacts the relevant professionals and informs them of the situation.
- If the child has current involvement with social care, the social worker is notified on the day of the unexplained absence.
- If at any time information comes to light that gives cause for concern, 06 Safeguarding children, young people and vulnerable adults procedures are followed immediately.

## **Safeguarding**

- If a child misses three consecutive sessions and it has not been possible to make contact, the designated person calls Social Care and makes a referral if advised.
- If there is any cause for concern i.e. the child has a child protection plan in place or there have been previous safeguarding and welfare concerns, the designated person attempts to contact the child's parent/carer immediately. If no contact is made, the child's absence is logged on 06.1b Safeguarding incident reporting form, and Social Care are contacted immediately, and safeguarding procedures are followed.

## **Poor/irregular attendance**

Whilst attendance at an early years setting is not mandatory, regular poor attendance may be indicative of safeguarding and welfare concerns that should be followed up.

- In the first instance the setting manager should discuss a child's attendance with their parents to ascertain any potential barriers i.e. transport, working patterns etc and should work with the parent/s to offer support where possible.
- If poor attendance continues and strategies to support are not having an impact, the setting manager must review the situation and decide if a referral to a multi-agency team is appropriate.

- Where there are already safeguarding and welfare concerns about a child or a child protection plan is in place, poor/irregular attendance at the setting is reported to the Social Care worker without delay.

In the case of funded children the local authority may use their discretion, where absence is recurring or for extended periods, taking into account the reason for the absence and impact on the setting. The setting manager is aware of the local authority policy on reclaiming refunds when a child is absent from a setting.

## 09 Childcare practice procedures

### 09.3 Prime times – The role of the key person

*'Each child must be assigned a key person'* (EYFS 2021)

Babies and young children need to form a secure attachment to key person when they join the setting to feel safe, happy, and eager to participate and learn.

#### **The key person role**

- A key person builds an on-going relationship with the child and his/her parents and is committed to that child's well-being while in the setting.
- Every child that attends is allocated a key person before they begin settling in - it is not the responsibility of the child to choose their own key person.
- Where possible a 'back up' key person is also identified for each child so that they can fulfil the role in the absence of the main key person, for example, during annual leave or sickness.
- The key person conducts the progress check at age two for their key children.
- The role is fully explained to parents on induction and the name of the child's key person and 'back up' key person is recorded on the child's registration form.
- The key person is central to settling a child into the setting. The setting manager and key person explain the need for a settling in process and agree a plan with the parents.
- Shift patterns and staff absence can affect a child who is just settling in; where possible, settling in should be matched to when the key person is on duty.
- The number of children for each key person takes into account the individual needs of children and the capacity of the key person to manage their cohort; it is also influenced by part-time places and part time staff. The setting manager should aim for consistency i.e. matching part-time staff to part-time children; full-time children should not be divided between key persons during the week.
- Photographs of key persons and their key groups are displayed clearly.
- The key person spends time daily with his or her key group to ensure their well-being.

#### **Parents**

- Key persons are the first point of contact for parents with regard to matters concerning their child and any concerns parents may have are addressed with the key person in the first instance.
- Key persons support parents in their role as the child's first and most enduring educators.

- The key person is responsible for the child's developmental records, completing the progress check at age two, and for sharing information about progress with the child's parents.

### **Learning and development**

- The key person helps to ensure that every child's learning and care is tailored to meet their individual needs. This is achieved through regular observation and assessment of children, using information gathered about their achievements, interests and learning styles to plan for each individual child's learning and development.
- If a child's progress in any of the prime areas gives cause for concern, the key person must discuss this with the setting manager or SENCO and the child's parents.

### **Prime times**

The key person role is explained further in the prime time procedures (09.4/6/7/8/10/14); the key person also maintains other responsibilities for key children including administering medication and signing accident records.

### **Back-up to key person**

- All other staff work to build good relationships with all children in their room. The role of the other practitioners in the room is to step in when the main key person is absent or unavailable to provide a stable and consistent care relationship for the child.
- These staff share information with parents in the key person's absence and make notes in the child's records where appropriate.
- These staff ensure that information is shared with the key person.

### **Safeguarding children**

- The key person has a responsibility towards their key children to report any concern about their development, welfare or child protection matter to the setting manager and to follow the procedures in this respect.
- Regular supervision with the setting manager provides further opportunities to discuss the progress and welfare of key children.
- The back-up key person has a duty likewise.

## 09 Childcare practice procedures

### 09.4 Prime times – Settling in and transitions

To feel securely settled and ready to learn, children need to form attachments with the adults who care for them, primarily a key person, but others too. In this way they feel part of a community; they are able to contribute to that community and receive from it. Very young children, especially two- to three-year-olds, approach separation from their parent with anxieties, older children have a more secure understanding of 'people permanence' and are able to approach new experiences with confidence; but also need time to adjust and feel secure. It is the entitlement of all children to be settled comfortably into a new environment.

The setting manager and key person explain the need for settling in and agree a plan with the parents. They write this down and both key person and parents keep a copy. Each day they review the plan and agree what will happen the next day.

#### Settling-in for those with SEND

- If a child has been identified as having SEND then the key person/SENCO and parents will need to identify and address potential barriers to settling in e.g. timings of medication and invasive procedures, specific routines and levels of support.

#### Starting a setting for the first time

- Before a child starts to attend our setting, we use a variety of ways to provide his/her parents with information. These may include written information including our prospectus and policies, displays about activities available within the setting, information days and evenings and individual meetings with parents.
- During the half-term before a child is enrolled, we provide opportunities for the child and his/her parents to visit the setting.
- The key person welcomes and looks after the child and his/her parents at the child's first stay and play session and during the settling-in process.
- We may offer a home visit by the by the person who will be the child's key person and a member of the management team to ensure all relevant information about the child can be made known.
- We use pre-start visits and the first session at which attends to explain and complete, with his/her parents, the child's registration records.
- When a child starts to attend, we explain the process of settling-in with his/her parents and jointly decide on the best way to help the child to settle into the setting.
- We have an expectation that the parent, carer or close relative, may stay for most of the session during the first week, gradually taking time away from their child; increasing this time as and when the child is able to cope.

- Younger children may take longer to settle, as will children who have not previously spent time away from home. Children who have had a period of absence may also need their parent to be on hand to re-settle them.
- We judge a child to be settled when they have formed a relationship with their key person; for example, the child looks for the key person when he/she arrives, goes to them for comfort, and seems pleased to be with them. The child is also familiar with where things are and is pleased to see other children and participate in activities.
- When parents leave, we ask them to say goodbye to their child and explain that they will be coming back, and when.
- We recognise that some children will settle more readily than others, but that some children who appear to settle rapidly are not ready to be left. We expect that the parent will honour the commitment to stay for a least the first week, or possible longer, until their child can stay happily without them.
- We may also suggest shorter sessions for periods of time increasing to the full session as the child settles.
- We do not believe that leaving a child to cry will help them to settle any quicker. We believe that a child's distress will prevent them from learning and gaining the best from the setting.
- We reserve the right not to accept a child into the setting without a parent or carer if the child finds it distressing to be left. This is especially the case with very young children.
- Within the first four to six weeks of starting, we discuss and work with the child's parents to begin to create their child's record of achievement.

### **For children whose first language is not English**

- For many children learning English as an additional language, the stage of proximity takes longer as the child is dependent upon the parents' input to make sense of what is going on.
- If the parent does not speak English, efforts are made to source an interpreter for induction; it will be helpful for them to see around the setting and be clear about their role in interpreting in the play area.
- The settling-in programme is explained to the parent, and it is emphasised how important it is that they stay with the child and talk to him/her in the home language to be able to explain things.
- Through the interpreter, the key person will try to gauge the child's level of skills in their home language; this will give the key person an idea of the child's interests and levels of understanding.
- The need for the parent to converse in the child's home language is important.

- The key person makes the parent feel welcome using smiles and gestures.
- With the parent, make a list of key words in the child's home language; sometimes it is useful to write the word as you would pronounce it. These words will be used with the child and parents will be addressed with 'hello' and 'goodbye' in their language.
- The key person prepares for the child's visits by having a favourite toy or activity ready for the child to provide a means to interact with the child.
- Children will be spoken to as per any other child, using gestures and facial expressions to help.
- When the child feels happy to spend time with the key person (secure base), the parent should spend time outside of the room.
- Progress with settling in will be done as with any other child; it just takes a little longer to reach dependency/independence.

## 09 Childcare practice procedures

### 09.5 Establishing children's starting points

When children start at the setting they arrive at different levels of learning and development. In order to help them to settle and make rapid progress it is important that they are provided with care and learning opportunities that are suited to their needs, interests and abilities. This means establishing and understanding their starting points and whether there are any obstacles to their learning, so that teaching can be tailored to the 'unique child'.

- The aim of establishing a child's starting points is to ensure that the most appropriate care and learning is provided from the outset.
- Starting points are established by gathering information from the first contact with the child's parents at induction and during the 'settling in' period. Staff do not 'wait and see' how the child is settling before they begin to gather information.
- The key person is responsible for establishing their key children's starting points by gathering information in the following ways:
  - observation of the child during settling in visits
  - discussion with the child's parents
  - building on information that has been gathered during registration by referring to the registration form

The information gathered is recorded within two weeks of the child's official start date and sooner where possible.

- The key person must make a 'best fit' judgment about the age band the child is working in, referring to Development Matters or Birth to Five Matters.
- The key person should complete details by indicating where they have gathered their evidence from, using more than one source where possible i.e. parent comment and observation during settling in.

If the initial assessment raises any concerns that extra support may be required procedure 09.13 Identification, assessment and support for children with SEND is followed.

## 09 Childcare practice procedures

### 09.6 Prime times – arrivals and departures

Prime times of the day make the very best of routine opportunities to promote 'tuning-in' to the child emotionally and to create opportunities for learning. Arrivals and departures are key times in the day when children need support from their carer to make the transition smooth and happy; these times of day also pose a certain level of risk as parents and carers come and go. All staff are aware of the potential risks and take measures to minimise them.

#### Arrivals

- Whenever possible the key person or back up key person always greets young children. This ensures that young children are received into the setting by a familiar and trusted adult.
- The key person who greets the child marks their presence in the register.
- If a child who is expected fails to arrive, this is recorded on the child's personal file and the setting manager is immediately notified so that they can contact the child's parents to find out why the child is absent following procedure 09.2 Absence.
- The person in charge greets the parents and takes time to hear information the parents need to share. They inform the parents of aspects of the day, such as if there is an agency member of staff or flexible worker in, which members of staff will be around later when parents collect their child, any planned outings, or special planned event. Any consent forms are signed.
- The key person receives the child physically and tunes in to how he or she is feeling and prepares to meet his/her needs.
- Always ensure that the parents say goodbye to their child and say when they are coming back, such as 'after tea', rather than just 'later'.
- If the member of staff receiving the child is not the key person, the member of staff will hand over the information shared by the parents to the key person when they arrive.

#### Injuries noted on arrival

- If a child is noted to have visible injuries when they arrive at the setting procedure 6.1 is followed.

#### Changing shifts and handing over information

- When the key person leaves or goes on a break, they handover the care of the child to a 'back-up' key person.

- If someone other than the key person receives the child, he/she will share any information from the parent and write a note for the key person. Confidential information should be shared with the setting manager to pass on.
- The key person shares information with the back-up key person, in this way they ensure that all information is passed on to the parent in the key person's absence.

### **Departures**

- Children are prepared for home, with clean faces, hands and clothes if required.
- Staff always aim to greet parents when they arrive. They hand over the child personally to the collecting adult.
- Only persons aged over 16 years should normally collect children. If a parent has no alternative, then this is agreed with the setting manager and a risk assessment completed and signed by the parent. In all cases the setting manager will ask the parents to ensure that in future alternative arrangements are made. If the parent is under 16 years of age a risk assessment will be completed. No child will be collected by anyone who has not reached 14 years of age. The risk assessment should take account of factors such as age/vulnerability of child, journey travelled, arrangements upon leaving the setting to go home/elsewhere.
- Practitioners verbally exchange information with parents.
- If someone other than the key person is with the child at the end of the day, the key person should pass general information to the other staff or write a note for the parents. Confidential information should be shared with the setting manager to pass on.

### **Maintaining children's safety and security**

Arrivals and departures pose a particular threat to the safety and security of the children, particularly when parents arrive at the same time or when in shared premises. To minimise the risk of a child leaving the building unnoticed, the setting manager conducts a risk assessment that identifies potential risks and the measures put in place to minimise them, such as staff busy talking to individual parents or doors left ajar. The risk assessment is shared with their line manager and is updated as and when required. View procedure 01.1 Risk assessment and 01.1a Generic risk assessment form for further guidance.

## 09.8 Prime times – Snack-times and mealtimes (older children)

### Snack times

- A 'snack' is prepared mid-morning and can be organised according to the discretion of the setting manager e.g. picnic on a blanket.
- Children may also take turns to help set the table. Small, lidded plastic jugs are provided with choice of milk or water.
- Children wash their hands before and after snack-time.
- Children are offered semi-skimmed milk (or dairy free alternative) as a main drink.
- Fruit or raw vegetables, such as carrot or tomato, are offered in batons, which children should be encouraged to help in preparing. Bananas and other foods are not cut as rounds, but are sliced to minimise a choking hazard.
- Portion sizes are gauged as appropriate to the age of the child.
- Biscuits should not be offered, but toast, rice cakes or oatcakes are good alternatives.
- Staff join in conversation and encourage children's independence by allowing them to pour drinks, butter toast, cut fruit etc.

### Lunch times

- Children wash their hands and sit down before they eat their packed lunches.
- Staff do not eat different food in front of children. Staff who are eating with the children role-model healthy eating and best practice at all times, for example not drinking cans of fizzy drinks in front of the children.
- Children are given time to eat at their own pace and are not hurried to fit in with adults' tasks and breaks. They are not made to eat what they do not like and are only encouraged to try new foods slowly.
- In order to protect children with food allergies or specific dietary requirements, children are discouraged from sharing and swopping their food with one another.
- Mealtimes are relaxed opportunities for social interaction between children and the adults who care for them.
- Children wash their hands after lunch. Information for parents is displayed on the parent's notice board, including:

- Ten Steps for Healthy Toddlers [https://infantandtoddlerforum.org/media/upload/pdf-downloads/HR\\_toddler\\_booklet\\_green.pdf](https://infantandtoddlerforum.org/media/upload/pdf-downloads/HR_toddler_booklet_green.pdf)
- Daily menus including identification of any foods containing allergens

## 09 Childcare practice procedures

### 09.9 Prime times – Intimate care and nappy changing

Prime times of the day make the very best of routine opportunities to promote 'tuning-in' to the child emotionally and to create opportunities for learning. Nappy changing times are key times in the day for being close and promoting security as well as for communication, exploration and learning.

#### **Nappy changing records.**

- Key persons record when they changed the child and whether the child passed a stool.
- A stool that is an unusual colour can usually be related to the food that was eaten, so it is important that this is noted. However, a stool that is black, green or very white indicates a problem, and the child should be taken to the doctor.
- Very soft, watery stools are signs of diarrhoea; strict hygiene needs to be carried out in cleaning the changing area to prevent spread of infection. The parent should be called immediately to collect their child, who must be taken to the doctor. The child must have passed at least 2 formed stools before returning.
- Sometimes a child may have a sore bottom. This must be noted and discussed with the parent and a plan devised and agreed to help heal the soreness. This may include use of nappy cream or leaving the child without a nappy in some circumstances. If a medicated nappy cream such as Sudocrem is used, this must be recorded as per procedure 04.2 Administration of medicine.

#### **Young children, intimate care and toileting**

- Wherever possible, key persons undertake changing young children in their key groups; back-up key persons change them if the key person is absent.
- Young children from two years may be put into 'pull ups' as soon as they are comfortable with this and if parents agree.
- Changing areas are warm, appropriately sited and there are safe areas to lay young children if they need to have their bottoms cleaned. There are mobiles or other objects of interest to take the child's attention.
- If children refuse to lie down for nappy change, they can be changed whilst standing up, providing it is still possible to clean them effectively.
- Each young child has his/her own supply of nappies/pull ups and changing wipes in their bag.

- Key persons ensure that nappy changing is relaxed and a time to promote independence in young children.
- Young children are encouraged to take an interest in using the toilet; they may just want to sit on it and talk to a friend who is also using the toilet.
- They are encouraged to wash their hands and have soap and paper towels to hand. They should be allowed time for some play as they explore the water and the soap.
- Anti-bacterial hand wash liquid or soap should not be used by young children, as they are no more effective than ordinary soap and water, this may be revised in times of a virus outbreak.
- Key persons are gentle when changing and avoid pulling faces and making negative comment about the nappy contents.
- Wipes or cotton wool and water are used to clean the child. Where cultural practices involve children being washed and dried with towels, staff aim to make reasonable adjustments to achieve the desired results in consultation with the child's parents. Where this is not possible it is explained to parents the reasons why. The use of wipes or cotton wool and water achieves the same outcome whilst reducing the risk of cross infection from items such as towels that are not 'single use' or disposable.
- Key persons do not make inappropriate comments about young children's genitals when changing their nappies.
- Older children use the toilet when needed and are encouraged to be independent.
- Members of staffs do not wipe older children's bottoms unless there is a need, or unless the child has asked.
- Key persons are responsible for changing where possible. Back-up key persons take over in the key person's absence, but where it is unavoidable that other members of staff are brought in, they must be briefed as to their responsibilities towards designated children, so that no child is inadvertently overlooked and that all children's needs continue to be met.
- Parents are encouraged to provide enough changes of clothes for 'accidents when children are potty training.
- If spare clothes are kept by the setting, they are 'gender neutral' i.e. neutral colours, and are clean, in good condition and are in a range of appropriate sizes.

- If young children are left in wet or soiled nappies/pull-ups in the setting, this may constitute neglect and will be a disciplinary matter.

Nappy changing is always done in an appropriate/designated area. Children are not changed in play areas or next to snack tables. If there are limitations for nappy change areas due to the lay-out of the room or space available this is discussed with the setting manager's line manager so that an appropriate site can be agreed that maintains the dignity of the child and good hygiene practice.

## 09 Childcare practice procedures

### 09.10 Prime times – Sleep and rest time

Sleep and rest times are key times in the day for being close and promoting security. Younger children will need to sleep but older children do not usually need to. No child is made to sleep.

During the Covid-19 outbreak every effort is made to place cots and sleeping mats at least two metres apart.

#### Children over 2yrs old

- Children sleep on rest mats.
- Nappies changed and heavier clothing removed.
- Hair accessories that may come lose or detach are removed before sleep/rest time.
- Children are settled by their key person and comforted to sleep. Key persons may gently stroke or pat children.
- If children fall asleep in-situ it may be necessary to move or wake them to make sure they are comfortable, they are not left to sleep in a buggy or bouncy chair.
- Sleeping children are regularly checked at least every ten minutes and are within sight and/or hearing of staff

#### Young children

- Young children sleep on rest mats.
- Nappies are changed and heavier clothing is removed.
- Hair accessories with parts that may come lose or detached and pose a choking hazard are removed before sleep/rest time.
- A separate area of the room is made as quiet as possible, perhaps with some soft music playing and curtains drawn.
- Young children are settled by their key person. They are soothed to sleep. Key persons may stroke or very gently pat children.
- Sleeping children are supervised within sight and/or hearing of staff at all times.

Safer Sleep for Babies (Lullaby Trust) [www.lullabytrust.org.uk/safer-sleep-advice](http://www.lullabytrust.org.uk/safer-sleep-advice)

## 09 Childcare practice procedures

### 09.12 Promoting positive behaviour

Positive behaviour is located within the context of the development of children's personal, social and emotional skills and well-being. A key person who understands children's needs, their levels of development, personal characteristics, and specific circumstances, supports this development. This ensures children's individual needs are understood and supported. Settling into a new environment is an emotional transition for young children especially as they learn to develop and master complex skills needed to communicate, negotiate and socialise with their peers. Skills such as turn taking and sharing often instigate minor conflicts between children as they struggle to deal with powerful emotions and feelings. During minor disputes, key persons help children to reflect and regulate their actions and, in most instances, children learn how to resolve minor disputes themselves. However, some incidents are influenced by factors, requiring a strategic approach especially if the behaviour causes harm or distress to the child or others. These situations are managed by the SENCO/key person using a stepped approach which aims to resolve the issue and/or avoid the behaviour escalating and causing further harm.

This is an unsettling time for young children. Practitioners are alert to the emotional well-being of children who may be affected by the disruption to their normal routine. Where a child's behaviour gives cause for concern, practitioners take into consideration the many factors that may be affecting them. This is done in partnership with the child's parents/carers and the principles of this procedure are adhered to

The setting manager/SENCO will:

- ensure that all new staff attend training on behaviour management such as *Understanding and Addressing Behaviour in the Early Years* (EduCare)
- help staff to implement procedure 09.12 Promoting positive behaviour in their everyday practice
- advise staff on how to address behaviour issues and how to access expert advice if needed

#### **Rewards and sanctions**

Children need consistent messages, clear boundaries and guidance to intrinsically manage their behaviour through self-reflection and control.

Rewards such as excessive praise and stickers may provide immediate results for the adult but do not teach a child how to act when a 'prize' is not being given or provide the skills to manage situations and emotions themselves. Instead, a child is taught to be 'compliant' and respond to meet adult expectations to obtain a reward (or for fear of a sanction). If used the type of rewards and their functions must be carefully considered.

Children are never labelled, criticised, humiliated, punished, shouted at or isolated by removing them from the group to be left in 'time out' or on a 'naughty chair'. If a child is distressed or causing harm to others, it may help to remove them from the immediate environment where the incident occurred. They should be taken to a quiet area by their key person for up to 5 minutes to help them calm down. If appropriate, the key person can use this time to help the child reflect on what has happened. Physical punishment of any kind is never used or threatened which could adversely affect a child's well-being. If staff become aware that another person has given corporal punishment to a child, they follow 06 Safeguarding children, young people and vulnerable adults procedures. Physical intervention to safeguard a child/children must be carried out as per the guidance in this procedure.

### **Step 1**

- The setting manager, SENCo and other relevant staff members are knowledgeable with, and apply the procedure 09.12 Promoting positive behaviour.
- Unwanted behaviours are addressed using an agreed and consistently applied approach to deescalate situations
- Behaviours that result in concern for the child and/or others must be discussed by the key person, SENCo/setting manager. During the meeting the key person must use their all-round knowledge of the child and family to share any known influencing factors such as a new baby in the family, child and/or parental illness, underlying additional needs to help place the child's behaviour into context.
- Appropriate adjustments to practice must be agreed within the setting. If relevant, a risk assessment should be carried out.
- If the adjustments are successful and the unwanted behaviour does not reoccur or cause concern then normal monitoring can resume.

### **Step 2**

- If the behaviour remains a concern, then the key person and SENCo must liaise with the parents to try to discover possible reasons for the behaviour and to agree next steps. If relevant and appropriate the views of the child must be sought and considered to help identify a cause.
- If a cause for the behaviour is not known or only occurs whilst in the setting, then the setting manager/SENCo must suggest using a focused intervention approach to identifying a trigger for the behaviour such as the ABC approach, i.e. Antecedents – what happened before; Behaviour – what was the behaviour observed; Consequences – what happened after the event.

- If a trigger is identified, then the SENCo and key person must meet with the parents to plan support for the child through a graduated approach via SEN support.
- Aggressive behaviour by children towards other children will result in a staff member intervening immediately to stop the behaviour and prevent escalation using the agreed initial intervention approach. If the behaviour has been significant or may have a detrimental effect on the child, the parents of the victim of the behaviour and the parents of the perpetrator must be informed. If the setting has applied a physical intervention, they must follow the guidance as set out below. The designated person completes 6.1b Safeguarding incident reporting form and contact Ofsted if appropriate. A record of discussions is recorded and parents are asked to sign.
- Parents must also be asked to sign risk assessments where the risk assessment relates to managing the behaviour of a specific child.
- If relevant, actions for dealing with the behaviour at home are agreed with parents and incorporated into the action plan. Other staff are informed of the agreed interventions and help implement the actions. The plan must be monitored and reviewed regularly by the key person/SENCo until improvement is noticed.
- Incidents and intervention relating to unwanted/challenging behaviour by children must be clearly and appropriately logged on 09.13b SEN Support - Action plan.

### **Step 3**

If despite applying initial intervention to deescalate situations and focused interventions to identify triggers the child's behaviour continues to occur and/or is of significant concern, the SENCo and key person invite the parents to a meeting to discuss external referral and next steps for supporting the child. It may be agreed that the setting request support from their Inclusion Partner and/or other specialist services such as the Area SENCo. This will help address most developmental or welfare concerns. If the behaviour is part of other welfare concerns that include a concern that the child may be suffering or likely to suffer significant harm, safeguarding procedures 06 Safeguarding children, young people and vulnerable adults procedures must be followed immediately.

- Advice provided by external agencies is incorporated in 09.13b SEN Support: Action Plan and regular multi-disciplinary meetings held to review the child's progress.
- If a review determines a statutory assessment may be needed then all relevant documentation must be collected in preparation for an Education Health and Care Assessment which may lead onto an Education, Health and Care Plan.

## **Use of physical intervention**

Staff will already use different elements of physical contact with a child as part of their interaction in the setting especially when they are comforting a child or giving first aid. However, physical intervention to keep a child or other children safe is different and should only be applied in exceptional circumstances.

The EYFS states that physical intervention from a staff member towards a child may be used for the purposes of “averting immediate danger of personal injury to any person (including the child) or to manage a child’s behaviour if it is absolutely necessary”.

Staff must do all they can to avoid using a physical intervention because this is not the preferred way of addressing children’s behaviour.

To offer protection to children a range of appropriate graded interventions may be needed before physical intervention is applied. Most single incidents such as a child throwing a book on the floor or kicking a chair usually only require a verbal intervention from a member of staff. In other situations, an intervention can be applied through mechanical and environmental means such as locking doors and stair gates. This usually stops a situation escalating. However, there will be some situations where a child places themselves or others in danger which requires an immediate need for the use of both verbal and physical intervention. If a single or persistent incident requires a physical intervention such as physical handling from a staff member towards a child, then this is used intentionally to restrict a child’s movement against their will. In most cases this can be applied through the use of the adult’s body gently and safely blocking the child from access to danger or to prevent danger.

To physically intervene, a practitioner may use “reasonable force” to protect a child from injuring themselves or others. Legally a practitioner may also use reasonable force to prevent a child from damaging property. However, we would expect that in instances of damaging physical property a child would only experience a physical intervention if the broken property presented a risk or is high value.

If a situation arises which requires urgent physical hands-on intervention this is best applied by the staff who knows the child well such as their key person who is more able to calm them or use other known methods for defusing situations without physical intervention.

## **Physical handling**

We use the principle of applying reasonable minimal force and handling in proportion to the situation. Staff use as little force as necessary to maintain safety. This intervention should only be used for as short a period as possible to keep the child safe and maintain well-being by aiming for:

- keeping the child’s safety and well-being paramount

- a calm, gentle but firm approach and application of the intervention
- never restricting the child's ability to breathe
- side-by-side contact with the child
- no gap between theirs or the child's body
- keeping the adults back as straight as possible
- avoiding close head-to-head positioning to avoid injury to the child and themselves (head butting)
- only holding the child by their 'long' bones to avoid grasping at the child's joints where pain and damage are most likely to occur
- avoiding lifting the child unless necessary
- reassuring the child and talking about what has happened
- only applying a physical intervention on a disabled child if training or preferred method is provided from a reputable external source e.g. British Institute of Learning Disabilities [www.bild.org.uk/](http://www.bild.org.uk/)

## **Risks**

There are risks associated with any physical intervention and handling of a child. The younger and more vulnerable a child may be, the greater risk to the child of using physical intervention towards them. However, there are also risks to children associated with not intervening physically; for instance, if a practitioner did not take hold of a child by the wrist, they may have run into the path of a fast-moving car.

Before intervening physically to protect a child from immediate harm a practitioner needs to decision make in a split second, considering the following factors. This is described as dynamic risk assessment.

- What is the immediate risk to this child if I do not intervene now?
- What might the risks be if I do intervene? If this was my child, what would I want someone looking after them to do in this situation?
- What is the minimum level of intervention that will be effective here? How can I do this as gently as possible for as short a time as possible and how am I going to manage myself to stay calm?

## **Recording**

Any instance of physical intervention is fully recorded immediately and reported to the designated person as soon as possible on 6.1b Safeguarding incident reporting form, ensuring that it is clearly stated when and how parents were informed. Parents are asked to sign a copy of the form which is then kept on the child's file. The designated person decides who will notify the parent and when, ensuring that the parent signs to say they have been notified. An individual risk assessment should be completed after any physical intervention with a child which considers the risks and likelihood of such behaviour re-occurring and how this will be managed. The risk assessment should be agreed and signed by parents.

### **Temporary suspension (fixed term)**

Any decision to temporarily suspend a child must be carefully considered lawful, reasonable and fair. If despite following the stepped approach for behaviour it is necessary to temporarily suspend a child, for no more than five days, on the grounds of health and safety, the following steps are followed.

- The setting manager provides a written request to suspend a child to their line manager; the request must detail the reason why the child must be suspended and the length of time of the proposed suspension.
- If the line manager approves, the parents must be invited to a meeting to discuss next steps. Parents are invited to bring a representative along. Notes must be taken at the meeting and shared later with the parents. The meeting must aim for a positive outcome for the child and not to suspend.
- If no acceptable alternative to suspension is found then the setting manager must give both verbal and written notice of time related suspension to the parent, meanwhile the setting manager must ensure that continued resolution is sought and suitable adjustments are in place for the child's return.

### **Suspension of a disabled child**

We have a statutory duty not to discriminate against a child on the basis of a protected characteristic. This includes suspending a child based on a disability. Ignorance of the law or claiming it was unknown that a child was disabled is no defence. However, if the child's behaviour places themselves or others at risk then the setting must take actions to avoid further harm. Time limited suspension may be applied to keep the child and/or others safe whilst finding a solution. Suspension is only used if reasonable steps and planned adjustments are first used to help resolve the situation. Without this action, suspension of a child with SEND may constitute disability discrimination (Equality Act 2010). A decision to suspend a disabled child must be clearly evidenced, specific, measurable, achievable, realistic and targeted. Plans and intervention must be recorded on the child's file and 9.12b SEN Support - Action plan. If little or no progress is made during the suspension period, the following steps are taken.

- The setting manager sends a written/electronic invite to the parents, a local authority representative and any relevant external agencies to attend a review meeting. Each attendee must be made aware that the meeting is to avoid the situation escalating further and to find a positive solution.
- After the meeting the setting manager continues to maintain weekly contact with the parents and local authority to seek a solution.
- Suitable arrangements offer the parent continued support and advice during the suspension. The setting manager reviews the situation fortnightly and provides their line manager with a monthly update.

### **Expulsion**

In some exceptional circumstances a child may be expelled due to:

- a termination of their childcare agreement as explained in 9.1d Childcare terms and conditions
- if despite applying a range of interventions (including reasonable adjustments), the setting has been unable to adequately meet the child's needs or cannot protect the health, safety and well-being of the child and/or others.

### **Challenging unwanted behaviour from adults in the setting**

We do not tolerate behaviour demonstrating dislike, prejudice, discriminatory attitudes or action towards any individual/group. This includes those living outside the UK (xenophobia). This also applies to behaviour towards specific groups of people and individuals who are British Citizens residing in the UK.

Allegations of discriminatory remarks or behaviour made in the setting by any adult will be taken seriously. The perpetrator will be asked to stop the behaviour and failure to do so may result in the adult being asked to leave the premises. Where a parent makes discriminatory or prejudice remarks to staff at any time, or other persons while on the premises, this is recorded on the child's file and is reported to the setting manager. The procedure is explained and the parent is asked to comply while on the premises. An 'escalatory' approach will be taken with those who continue to exhibit this behaviour. The second stage comprises a letter to the parent requesting them to sign a written agreement not to make discriminatory remarks or behave in discriminatory or prejudice ways; the third stage may be considering withdrawing the child's place.

## **09 Childcare practice procedures**

### **09.13 Identification, assessment and support for children with SEND**

We have regard for the Special Educational Needs and Disability (SEND) (DfE and DoH 2015) which states that local authorities must ensure that all early years providers that they fund in the maintained, private, voluntary and independent sectors are aware of the requirement on them to meet the needs of children with SEN and disabilities. When securing funded early education for two, three- and four-year-olds local authorities should promote equality and inclusion for children with disabilities or SEN; this includes removing barriers that prevent access to early education and working with parents to give each child support to fulfil their potential. During the Covid outbreak we will review and update children's SEN support plans more frequently to ensure their progress and well-being.

The term SEN support defines arrangements for identifying and supporting children with special educational needs and/or disabilities. We are required to offer appropriate support and intervention and to promote equality of opportunity for children that we care for. Children's SEND generally falls within the following four broad areas of need and support:

- communication and interaction
- cognition and learning
- social, emotional and mental health
- sensory and/or physical needs

Graduated approach

Initial identification and support (identifying special educational needs)

- Ongoing formative assessment forms part of a continuous process for observing, assessing, planning and reviewing children's progress.
- Children identified as having difficulty with one or more area of development should be given support by applying some simple strategies and resources.
- For most children application of some simple differentiation approaches will be enough to build confidence and help the child develop, 9.12a SEN Support: Initial record of concern form can be used for this purpose.
- If despite applying differentiated strategies a child continues to struggle and is showing significantly more difficulty with learning than their peers or has a disability which requires specific adjustments, then the key person should raise a concern with the setting's SENCo/setting manager and the child's parents.

## Observation and assessment of children's SEN

Where a child appears to be behind expected levels, or their progress gives cause for concern, practitioners should consider all the information about the child's learning and development from within and beyond the setting.

- Information can be collated from formal checks such as the progress check at age two, observations from parents and observation and assessment by the setting of the child's progress.
- When specialist advice has been sought externally, this is used to help determine whether or not a child has a special educational need (SEN).
- The child's key person and SENCo/Manager use this information to decide if the child has a special educational need.
- If the decision is that the child does have a SEN and the parents are not already aware of a concern, then the information is shared with them. Once parents have been informed, they should be fully engaged in the process, contributing their insights to all future actions for their child.

## Planning intervention

- Everyone involved with the child should be given an opportunity to share their views. Parents should be encouraged to share their thoughts on the child's difficulties and be involved in the decision as to what will happen next.
- A first intervention option may be to carry on with applying differentiated support and to review the child's progress at an agreed date. If the child's needs are more complex, then the decision maybe to go straight ahead and prepare a One Plan with detailed evidence-based interventions being applied straight away and simultaneously external referrals made.
- If relevant, then the child should be appropriately included in development of the One Plan but only at a level which reflects their stage of comprehension.
- One Planning described below, ensures that children that are identified, or suspected of having a SEN will receive the right level of support and encouragement with their learning and development as early as possible.

## Involving the child

- The SEND Code of Practice supports the rights of children to be involved in decisions about their education.

- Inclusion of children with SEND helps build self-confidence and trust in others.
- Ascertaining children's views may not be easy, a range of strategies will be needed.
- Accurate assessment helps identify children's strengths and possible barriers to learning.
- The key person and setting manager/SENCo work in partnership with parents and other agencies to involve the child wherever appropriate.
- Children are involved at appropriate stages of the assessment and to their level of ability.
- Establishing effective communication is essential for the child's involvement.

### **SEN One plan**

- A One Plan, should show what support is required to help achieve outcomes for the child and detail the frequency of these interventions and who will apply them and with what resources.
- A review date (at least termly) should be agreed with the parents so that the child's progress can be reviewed against expected outcomes and next steps agreed.
- A copy of the plan is stored in the child's file so that any other member of staff or an inspector looking at the file will see how the child is progressing and what interventions have been or are being applied.
- If a child requires specific medical interventions during their time in the setting, 04.2a Health care plan form should also be completed and integrated into the general plans to ensure the child's medical needs are known and safely met.
- The One Plan should provide an accessible summary of the child's needs, which can be used if further assessment is required including a statutory Education Health and Care (EHC) Assessment, and development of an EHC plan.

### **Drawing up a One Plan**

- If external agencies are already involved at this stage, then they should also be invited to help decide on what appropriate interventions are needed to help meet outcomes for the child. The SENCo/setting manager should take the lead in coordinating further actions including preparation of the action plan and setting short-term targets.

- Where there are significant emerging concerns (or an identified special educational need or disability) targeted action plans are formulated that relate to a clear set of expected outcomes and stretching targets.
- One Planning, highlights areas in which a child is progressing well; areas in which some additional support might be needed and any areas where there is a concern that a child may have a developmental delay (which may indicate a special educational need or disability). It describes the activities and strategies the provider intends to adopt to address any issues or concerns.
- Planned intervention should be based on the best possible evidence and have the required impact on progress with longer-term goals covering all aspects of learning and development and shorter-term targets meeting goals.
- The plan should focus on the needs of the child, the true characteristics, preferences, and aspirations of the child and involvement of the parents with a clear set of targets and expected outcomes for the child. Effective planning at this stage should help parents and children express their needs, wishes, and goals:
  - focus on the child as an individual and not their SEN label
  - be easy for children to understand and use clear ordinary language and images, rather than professional jargon
  - highlight the child strengths and capacities
  - enable the child, and those who know them best, to say what they have done, what they are interested in and what outcomes they are seeking in the future
  - tailor support to the needs of the individual
  - organise assessments to minimise demands on families
  - bring together relevant professionals to discuss and agree together the overall approach
- If the child fails to make progress and multi-agency support is sought, then it is at this point that Early Help/CAF assessment should be considered.

### **Record keeping**

If a child has or is suspected of having a SEN, a dated record should be kept of:

- the initial cause for concern and the source of this information, (the progress check at age two and/or outcomes of previous interventions). 09.13a SEN support: Initial record of concern form can also be used for this purpose drawing information from other sources
- the initial discussion with parents raising the possibility of the child's SEN
- the views of the parents and other relevant persons including, wherever possible, the child's views;
- the procedures followed with regard to the Code of Practice to meet the child's SEND e.g. SEN action plan, referrals to external agencies and for statutory assessment
- evidence of the child's progress and any identified barriers to learning
- advice from other relevant professionals; and all subsequent meetings with parents and other persons and any subsequent referrals

Records may include

- observation and monitoring sheets
- expressions of concern
- risk assessments
- access audits (01.1b)
- health care plans (including guidelines for administering medication)
- SEN one plans
- meetings with parents and other agencies
- additional information from and to outside agencies
- agreements with parents
- guidelines for the use of children's individual equipment; Early help CAF referrals
- referral to the local authority identifying a child's special educational needs and request for statutory Education, Health, Care (EHC) needs assessment; and a copy of an EHC plan

### **Seeking additional funding/enhanced/top up**

If the child's needs cannot be met from within the setting's core funding, then it will be at this point that the evidence collated will be used to apply for top up/enhanced funding from the local authority's inclusion fund. If a new or existing child is disabled, then the setting should check if the family is in receipt or have applied for Disability Living Allowance. If so, the setting will be able to apply to their local authority for the local Disability Access Fund.

## **Statutory education, health and care (EHC) assessment and plan**

### **Statutory assessment**

- If a child has not made progress, then the next steps may be for the child to undergo an Education, Health and Care Assessment.
- If a child is under compulsory school age, the local authority will conduct an EHC needs assessment if they consider that the child's needs cannot be met within the resources normally available to the early years setting.
- Children aged under age two are eligible where an assessment has indicated that the child is likely to have SEN which requires an EHC plan when they reach compulsory school age.
- When a child's needs appear to be sufficiently complex, or the evidence suggest specialist intervention then the local authority is likely to conclude that an EHC plan is necessary
- The local authority should fully involve the parent and must seek advice from the setting in making decisions about undertaking an EHC assessment and preparing an EHC plan.
- Settings should prepare by collating information about the child's SEND including:
  - documentation on the child's progress in the setting
  - interventions and support provided to date
  - evidence of external agency assessment, support and recommendations
  - parental views and wishes (and where appropriate those of the child)

The information will then be submitted to the local authority to allow them to accurately assess the child in the context of the support already given.

- The local authority must inform the child's parents of their decision within six weeks of receiving a request for an assessment and give its reasons for their decision. If the local authority decides to conduct an assessment, it must ensure the child's parents are fully included right from the beginning and are invited to contribute their views. If the local authority subsequently decides not to conduct an assessment it must then inform the parents of their right to appeal that decision, of the requirement for them to consider mediation should they wish to appeal.
- If the local authority decides that a statutory EHC plan is not necessary, it must notify the parents and inform the provider, giving the reasons for the decision. This notification must take place within 16 weeks of the initial request or of the child having otherwise been brought to the local authority's attention.

- If the decision following an assessment is to compile an EHC plan the local authority should consult collaboratively with the parents in the preparation of the plan ensuring that their views and their child's preferences are taken into account and that plans describe positively what the child can do and has achieved to date.
- Plans are evidenced based and focus on short term outcomes and long-term aspirations for the child including family and community support. Parents have the right to request a particular provision for their child to be named within their EHC plan.
- If an early years setting is named, the local authority must fund this provision. They cannot force a setting to take a child and can only name the provision in the EHC if the setting agrees.
- Local authorities should consider reviewing an EHC plan for a child under age five at least every three to six months. Such reviews would complement the duty to carry out a review at least annually but may be streamlined and not necessarily require the attendance of the full range of professionals, depending on the needs of the child. The child's parents must be fully consulted on any proposed changes to the EHC plan and made aware of their right to appeal to the Tribunal.

### **External intervention and support**

Where external agency intervention has been identified to help support a child with SEND then this intervention should be recommended in writing by a suitably reliable source such as a speech and language therapist, paediatrician or educational psychologist.

## 09 Childcare practice procedures

### 09.14 Prime times – Transition to school

Moving on to school is a major transition in a child's life involving separation from familiar adults and children. Older children have a more secure understanding of 'people permanence' and are able to approach new experiences with confidence. However, they need preparation if they are to approach transition to school with confidence and an awareness of what to expect.

#### **Partnership with schools**

- Details of the school that a child will be attending are recorded in the child's file along with the name of the reception class teacher.
- Every effort is made to forge and maintain strong links with all schools that children may attend. The setting manager will approach schools in order to open lines of communication where these have not previously existed.
- Details of the school's transition or settling in procedures are kept by the setting and are referred to so that members of staff are familiar with them and can develop a consistent approach to transition with teachers, parents and children.
- Teachers are welcomed into the setting and sufficient time is made for them to spend both with the child, their parents and with the key person, to discuss and share information that will support the child's transition to school.
- A child's EYFS profile and learning journey record is made available for parents to download.
- Any action plans relating to a child's additional needs are also shared, where this is in place.
- Other formal documentation such as safeguarding information is prepared in line with procedure 07.6 Transfer of records.

#### **Partnership with parents**

- Key persons discuss transition to school with parents and set aside time to discuss learning and development summaries. Parents are encouraged to contribute to summaries.
- Key persons will discuss with parents how they are preparing their child for school and will share information about how the setting is working in partnership with the school to aid transition.

- Key persons will make clear to parents the information that will be shared with the school, for example, information regarding child protection and work that has taken place to ensure the child's welfare.

### **Increasing familiarity for children**

- Where the setting is on, or adjacent to a school site, there will be opportunities for children to become familiar with staff and school premises, for example shared use of outdoor and indoor spaces, activities and resources.
- Where possible, the key person will take the child to visit the new school, if this is the school's transition policy.
- If there are several schools in a catchment area, or the setting is not within a reasonable distance of the school, other means of familiarisation will be explored. This could be through videos, photographs or other information about the school that can be shown within the setting. Staff may borrow resources from the schools and will use these with the children.

### **Preparing children for leaving**

- Children and parents form bonds with adults and children in the setting and will need preparation for separating from the relationships they have formed.
- The child's last day should be prepared for in advance and marked with a special celebration or party that acknowledges that the child is moving on.
- Parents should not be discouraged from bringing the child for the occasional brief visit, as separations often take time to complete. Sometimes children need the reassurance that their nursery/pre-school is still there and that they are remembered.

## 09 Childcare practice procedures

### 09.15 Procedures for 2-year-old children

At Fairview Under Fives, we understand that two-year-olds have their own unique stage of development. Their learning, exploring and behaviour differ from that of three and four year olds and require individual provision, learning opportunities and expectations targeted towards them.

We aim to provide our two-year-olds with a stimulating and nurturing environment which helps them feel safe and happy and gives them opportunity to grow in independence.

Our named two-year-old lead Bryony Walton, takes responsibility for auditing the environment, ensuring appropriateness of resources and activities and supporting staff in practice.

#### **Procedures for two-year-old children**

- Following statutory framework staffing ratios, one member of staff is required per four children.
- The indoor space requirement is 2.5 meters squared per child.
- Children may start Fairview from the academic term after their second birthday.
- We request that children aged between two and three years attend a minimum of three half day sessions per week (9 hours equivalent). This improves a child's ability to settle and build attachments with their Key Person whilst increasing their opportunities to engage in all seven areas of early learning.
- A Key Person is allocated to every two-year-old before the child starts. The Key Person's role is to build a relationship with the child and their family, whilst acting as a key contact for family to express any worries or concerns and building a personalised plan for the child's well-being, care and learning.

#### *Rainbow Room*

- Where possible two-year-olds will be placed within the Rainbow Room.
- The Rainbow Room has been set up specifically with Two-year-olds in mind, offering: inviting play spaces, a wide range of age appropriate activities including sensory and role play, a cosy area for quiet time and resources stored at low level for ease of access for smaller children. The toilets are within easy access and are supervised by a member of staff when in use.
- The wide range of developmentally appropriate resources promote independence and allow children to follow their own ideas and interests.
- The gate to the two-year-old garden is kept locked at all times when children are on the premises. A staff member monitors the gate at all times when children are in the garden area.

- We understand that two-year-olds need consistency therefore have a simple daily routine which is displayed in pictures for children to view themselves.

### *Sleeping*

Although we do not encourage sleeping during the session times, we understand that younger children or children with SEN can become quite distressed and upset when tired and may need a nap occasionally. A designated sleep mat is placed in a quiet and safe space along with a blanket. Whilst a child sleeps a member of staff must keep the child in view, checking on them at regular ten minute intervals, to ensure they are not getting too hot/cold and are breathing. A sleep record is completed, indicating the time the child fell asleep, signed at each ten minute check and the time the child woke up/was woken. Details of the sleep are uploaded to their online journal (Tapestry) for parent information. The mat is disinfected, and the blanket washed after each use.

### *Toileting and Changing*

We see toilet training as a self-care skill that children have the opportunity to learn with full support and non-judgemental concern of adults. We take into consideration that for two-year-olds the transition from nappies/pull ups to using the toilet is a big step and requires individual support and encouragement whilst following a care plan incorporating their home routines. When toilet training, parents are encouraged to send their child with several spare pairs of trousers/leggings, underwear, socks and shoes for any toileting accidents.

Nappies/Pull Ups are changed at least once every session and more frequently if needed. Children's nappies/pull ups will be changed by their Key Person unless that member of staff is not in attendance. A second member of staff is allocated to every child for occasions when their Key Person is not available.

### *The Progress Check at age Two*

- A template for completing the two-year-old progress check is on Tapestry.
- The key person is central to the progress check and must be the person completing it.
- Settings should take guidance from their local authority as to when the progress check at age two is completed; if no such guidance is provided, the progress check is completed when the child is between 26 and 30 months old. The child should be attending the setting for at least 1 term before the check is completed.
- Once the timing of the child's progress check is confirmed, parents are invited to discuss their child's progress at a mutually convenient time.
- The setting must seek to engage both parents and make allowance for parents who do not live with their child to be involved.

## **Completing the progress check at age two**

- On-going observational assessment informs the progress check and must be referred to.
- Children's contributions are included in the report. Staff must be 'tuned in' to the ways in which very young children, or those with speech or other developmental delay or disability, communicate/
- Where any concerns about a child's learning and development are raised these are discussed with the parents, the SENCo and the setting manager.
- If concerns arise about a child's welfare, they must be addressed through 06 Safeguarding children, young people and vulnerable adults procedures.
- The key person must be clear about the aims of the progress check as follows:
  - to review a child's development in the three prime areas of the EYFS
  - to ensure that parents have a clear picture of their child's development
  - to enable practitioners to understand the child's needs and, with support from practitioners, enhance development at home
  - note areas where a child is progressing well and identify any areas where progress is less than expected
  - describe actions the provider intends to take to address any developmental concerns (working with other professionals as appropriate)
